

ENTICING ROTARIANS TO ATTEND SCOTT PEARSON'S ROTARY PRESENTATION

What construction company would take on the challenge of a project where every detail would be critiqued by the Joanna Gaines? On top of Joanna's discerning eye, the construction project would be videotaped for millions of TV viewers to watch. Was there enough space at the Silos site for television crews and construction crews? Hear from Pearson Construction's company owner Scott Pearson about why he decided to take on this challenge. What was it really like to work with Chip and Joanna? Will he work with them again?

Chip and Joanna were well aware of Pearson Construction's reputation of integrity, trust and quality. They knew of Pearson's work with Baylor University -- new construction such as the Hawkins Indoor Tennis Facility, as well as renovations at the Hankamer School of Business, the Mary Gibbs Jones Family and Consumer Sciences Building and many, many other projects for Baylor. Pearson built the Midway ISD Student Activities Center, numerous projects at TSTC including the Culinary Arts building. The company recently turned a bowling ally into a church (Grace Church in the old Lake Air Lanes on Bosque Blvd.). Pearson is nearly finished building the new building for Stanton Optical on Lake Air and Waco Drive.

Scott's parents are Sandra Pearson and the late Bob Pearson. He grew up in Waco, attended Midway Schools and graduated from Texas A&M. He has a sister Jill and a brother Kyle. Scott lives in Crawford with his wife Jill and four children, two of whom are in college. He is on the Crawford ISD school board, and he is the 2016 chair of the Association of General Contractors local chapter, who recently honored Pearson with the Outstanding Construction for the Magnolia Market Silos Historic Renovation.
